PROFILE

Hello! I am a web developer with over three years of experience specializing in front-end development. I also understand the back-end part well. I can create a unique product using React and Next.js, implement animations with GSAP, integrate 3D models, and apply best practices such as TypeScript, Tailwind, and SCSS. From the back-end part, I can connect a CMS like strapi or sanity. All solutions will be modern, adaptive, and SEO-optimized. Another option is to create a site based on HTML, CSS, and JS and further integrate it into WordPress.
For me, SOLID, KISS, and OOP are not just abbreviations but tools that I actively use to make the code understandable, universal, and effective. I like to create clean and scalable solutions and constantly improve my skills.

TECH STACK

html5/css3 | js | ts | react | react-router-dom | react hooks | redux | toolkit | thunk | saga | next | axios | rest | qraphQl | websockets | tailwind | scss | gsap | shadcn/ui | zod | formik | vite | wepback | eslint / prettier | terminal | docker | git | github | gitlab | classnames | clsx | day.js | swiper | splide

FAMILIAR

node | php | nest | express | sanity | strapi | wordpress | firebase | mongo | mongoose | prisma | swr | sentry | jwt | oAuth | next-auth | three.js | drei | fiber | i18next | daisyui | styled-component | figma | pixi.js

WORK EXPERIENCE

Evoplay | frontend developer

I was involved in the development and support of web projects in the gambling sector and developed the client side of the project for a cryptocurrency startup.

May 2023 - present

- Added new game logic, such as talismans, loot boxes and player races.
- Completely redesigned the UI part of existing projects by the updated layouts.
- Created AMP versions of products for Google to improve loading speed and SEO.
- Implemented support for light and dark themes for sites.
- Layout of pages with animations of various complexity using GSAP, and CSS animations.
- Optimized the logic of the event calendar, news display and notification block in accordance with new requirements.
- Optimized images: converted all images to modern formats and selected optimal sizes to improve site performance.
- Optimized the rendering of components in projects, reducing the number of unnecessary re-renders and fixing errors.

The last couple of works in which I took the main part:
League of Slots and **Seastar** are modern platforms for online slots and casinos, built with a cutting-edge technology. For access, a VPN might be required depending on your region. 🌍🔒
CrazyTime.games - I worked on semantics and caching for better seo and search results

Softlab Pro | frontend developer

Participated in the development of a platform for real-time sports event streaming with a flexible and dynamic UI.

Aug 2022 - Apr 2023

- Developed and adapted components based on design mockups, ensuring consistency with the overall UI/UX style.
- Integrated third-party APIs for data synchronization and real-time updates.
- Fixed bugs, improved code quality, and wrote unit tests for critical components.
- Actively participated in Q&A sessions and team meetings.

Additional Experience

Also participated in various freelance projects, working as part of a small team that included myself as a developer and UX/UI designer, while also collaborating with external SEO specialists and copywriters. These projects included the development of a website for a charitable foundation, the creation of business card websites, a platform for cosmetology services, an eCommerce project on Shopify, the integration of layouts with a transition to HTML5 for review websites on WordPress, and the development of a medical reference guide for pharmaceutical products.

This experience provided me with a unique opportunity to work with different technologies, **expanded** my **skills**, and improved my adaptability in **problem-solving**.

PORTFOLIO

My pet projects

👉 **Beautica** - fully responsive, SEO-friendly landing page for a cosmetologist. { **Visit** - **Code** }
Features: a custom design that highlights the specialist and professional beauty treatments, including services. The website ensures a smooth user experience with elegant animations and optimized performance
Tech Stack: next.js, typescript, tailwind, shadcn.

👉 **Clothes E-Commerce** – a modern online store for clothing with a user-friendly UI/UX. { **Visit** - **Code** }
Features: Home page, category and product pages, authentication, admin dashboard.
Tech Stack: next, typescript, tailwind, daisyui, prisma, mongodb, firebase store.

👉 **Portfolio Website for a Designer** – a modern online store for clothing with a user-friendly UI/UX. { **Visit** - **Code** }
Features: Showcasing design projects and animations, emphasis on creativity and user engagement, fully responsive and modern design
Tech stack: Next.js, JavaScript, Tailwind CSS, GSAP.js

👉 **Portfolio Website for a Designer** – a landing page presentation of the iPhone. { **Visit** - **Code** }
Features: A project for practicing animations, 3D visualizations, and Sentry integration
Tech stack: react, vite, sentry, js, tailwind, three.js, gsap.

👉 **Green energy** – a multi-page landing with Blog and CMS on Sanity.io. { **Visit** - **Code** }
Tech Stack: next.js, typescript, gsap, tailwind, sanity.io

EDUCATION

2020-2021 — GROMCODE UNIVERSITY
front end developer

2006-2011 — Volyn Institute of Economics and Management
Management of Organizations
